SUMMARY

Final-year B.Tech CSE student at Christ College of Engineering with a strong interest in Full-Stack Development and AI/ML. Experienced in building web applications using React, Node.js, FastAPI, MySQL, and MongoDB, with expertise in Python, deep learning, and NLP. Developed a hybrid animal detection system and secured 1st prize at the AstraX 42-hour hackathon for Quick-Care. Gaining practical application development experience through an Infosys Springboard internship, demonstrating strong problem-solving, teamwork, and a passion for developing innovative, real-world solutions.

EXPERIENCE

Infosys Springboard – Virtual Internship Jul 2026 – Present

- Developing an AI-powered web application using FastAPI, React.js, PostgreSQL, and modern AI frameworks.
- Implementing secure user authentication, backend APIs, and AI-driven features to improve application functionality.

InAmigos Foundation – Web Development Intern Jul 2026 (2 Weeks)

- Developed awareness webpages and researched NGO projects and campaigns to support digital outreach.
- Proposed website enhancements and designed user-friendly NGO website features using AI tools and Figma.

PROJECTS

WildGuard: Hybrid Deep Learning Animal Detection & Deterrent System Jan – Apr 2026

- Built a hybrid model combining DenseNet-201 and ResNet-50 architectures, achieving 94% detection accuracy.
- Integrated real-time monitoring and alert systems using Firebase through a Progressive Web App (PWA).
- Tech Stack: Python, Deep Learning (DenseNet-201, ResNet-50), Firebase, Progressive Web App.

Quick-Care: AI Caregiver Workload Optimisation Engine Mar 2026

- Developed an AI-powered caregiver workload optimisation platform with a React frontend and Node.js backend.
- Integrated Groq API and Llama 3 to improve healthcare task management and response efficiency.
- Tech Stack: React, Node.js, Groq API, Llama 3.

Disaster Resource Co-ordination System Aug – Oct 2025

- Built a platform for efficient resource coordination during emergencies using React, Node.js, and MySQL.
- Enabled real-time tracking and allocation of disaster relief resources through a centralized system.
- Tech Stack: React, Node.js, MySQL, RESTful APIs.

EDUCATION

B.Tech, Computer Science & Engineering – Christ College of Engineering, Irinjalakuda 2023 – 2027
CGPA: 8.86/10 (up to S6), BeachHack Decoration Team Member

12th Kerala State Board, Computer Science – Carmel H.S.S, Chalakudy 2021 – 2023
97.67%, 2nd Prize, Web Designing Competition (Chalakudy Sub-District Level)

TECHNICAL SKILLS

Programming Languages: Python, C++, C, JavaScript.
Web Development: HTML, CSS, React, Node.js, FastAPI, RESTful APIs.
Databases: MySQL, PostgreSQL, MongoDB.
Machine Learning & AI: Neural Networks, Deep Learning.
Tools & Platforms: GitHub, Postman, VSCode, Figma, Antigravity, Groq API, Firebase.

ACHIEVEMENTS & ENGAGEMENTS

- Paper presentation at the International Conference CHORDS 2026, IIIT Kottayam (Jul 2026).
- 1st Prize, Software Track – AstraX 42-hour Hackathon, RSET, Kakkanad (Mar 2026).
- Developed a School Election App used by 1,000 students at St. Don Bosco Girls' High School, Kodakara (Aug 2025).
- Volunteer for FIFA Tournament (Techletic 4.0) and Python Debugging Competition pre-event (Beach Hack 7).
- Participated in Relay Coding 2025 (FOSS CCE) and CodeFix 2025 (CODE CCE).

CERTIFICATIONS

- IBM Certification in Introduction to Deep Learning & Neural Networks with Keras.
- Infosys Springboard Certifications in AI, Data Science, Deep Learning, NLP, and Computer Vision.
- NPTEL Certifications in Machine Learning for Engineering and Science Applications and Database Management Systems.
- MATLAB Certifications in Calculations with Vectors & Matrices and Deep Learning Onramp.
